Ideas considered

- AI legal document generator
- Rental agreement / contract template filler
- Clause suggestion assistant
- Legal document summarizer
- Document editor with export options

Selected idea

LegalEase generates a complete, structured legal document from just four user inputs using Generative AI, then lets the user edit and export it. The team prioritized it because it demonstrates AI integration, input validation, a REST backend, a web interface and multi-format export in one practical project.

Priority criteria

- Usefulness to users
- Generative AI relevance
- Implementation feasibility
- Modular design (UI, API, AI core)
- Demonstration value
